

Data Security Platform

Reduce Risk. Achieve Compliance. Lower Investigation Times.

All organizations should have the ability to know at any time how their users are interacting with their critical systems and data. To do this, we take a data-centric approach to security, allowing you to focus on what matters most.

Our Data Security Platform provides organizations with one consolidated solution for enterprise-level insight into your data and the surrounding systems - on-premise or in the cloud. Whether you're trying to address data breaches, privilege abuse, insider threats or compliance - RSI is here to help.

Address key areas of data-centric security

Data Classification

Discover, tag, classify and score your sensitive data based on the associated risk.

Data Access Governance

Determine who has access to what and whether those access levels are appropriate.

User Behavior Analytics

Track user interaction with your data and systems and identify potential anomalies.

Change Auditing & Reporting

Audit, report and alert on changes to security states, permissions and data.

Reduce Risks to Your Security

Achieve & Maintain Compliance

Detect, Investigate & Respond to Threats

Protect Core Systems - On Premise & In the Cloud

Integrate with any of your apps or SIEM solutions for even wider coverage.

Focus on Your Compliance & Cyber Risk Intelligently

Identify and resolve security incidents quickly through real-time and intuitive dashboards and reporting.

Intuitive Dashboard

Instantly see a summary of all changes made from a single dashboard. View changes as they are happening with our Live Feed feature. Spot trends and anomalies in user behavior.

Real Time Alerting

Create instant alerts when specified events occur. Build threshold alerts to help identify threats. Receive real time alerts straight to the app, console or a specific email address.

Universal Auditing

The Data Security Platform covers any cloud platform with numerous out of the box templates - making it the best in class when it comes to on-premise and cloud data security.

Mobile App

Track changes on the go with a live feed of changes/alerts as they happen can be found on your mobile. Designed to work on any Apple or Android enabled device.

Granular Reporting

Hundreds of compliance-ready reports for easy and quick access to compliance-related data. Quickly identify the 'who, what, where and when' of any change by email or delivered to the mobile app.

Data Access Governance

Detailed analysis and alerts on user behavior with sensitive data, and ensure appropriate access rights by analyzing permissions to your unstructured data.

From audit readiness to strategic security initiatives, we've got your back throughout your entire Cyber Risk Journey

THE RSI DIFFERENCE

Strategic Virtual CISO (vCISO) Every Step of the Way

- Provide Strategic Advisory during your assessment to ensure we accurately gauge your threat environment
- Assist your efforts to enhance your security posture and increase your cyber confidence
- Support your organization in remediation efforts after the assessment has been completed

Managed Security Services - 24x7

- RSI consults, architects, deploys and supports complete compliance and cyber security initiatives.
- With RSI's expertise and years of experience, organizations are better able to protect themselves from preventable incidents, efficiently respond to unexpected events, and quickly mitigate threats.

Powered by

About RSI: Since 1982, RSI has provided innovative technology solutions, advanced professional services and fully automated solutions for effective business workflow. With RSI, clients realize that relationships matter, and our quality is embedded into our culture. Through our proven Assess-Remediate-Maintain process, RSI helps clients manage complexity and drive a return on your IT investment. We serve the enterprise with proactive cyber security solutions, custom software development for business process improvement, and advanced IT operations to create greater efficiencies. RSI uniquely supports remote data collection through advanced drone flight services.
