

# InMAIL

FOR SL2100  
COMMUNICATIONS SYSTEM

Customers expect to conduct business quickly and easily. They have no tolerance for long call-holding periods, incorrect call routing or lost messages. NEC's UNIVERGE InMail is the ideal solution for businesses wishing to maximize customer satisfaction by ensuring that all callers get to the people and information that they need without prohibitive hold times or dropped calls.

InMail automates your communications by providing digitally-integrated voice messaging capabilities and Automated Attendant features. This embedded solution for NEC's hybrid SL2100 Communications System can help meet your organization's communications needs both now and in the future.

**InMAIL**  
SOLUTION

## Improves Customer Satisfaction

InMail's robust Automated Attendant feature set ensures your customer calls are routed to the appropriate people and answered quickly and efficiently. When customers call in, an instruction menu announcement plays to provide them a choice of dialing options. They can simply direct themselves to the party that they are calling without being placed on hold or having their calls dropped.

## Increase Employee Productivity

InMail can increase your employee productivity by offering more control over incoming calls.

### These capabilities include:

- > Easy one-touch access to voicemail features that help your workers efficiently manage calls and messages.

**InMAIL**  
AT A GLANCE

- > An embedded solution for NEC's hybrid SL2100 Communications System for small businesses
- > Improves customer satisfaction by quickly and efficiently routing calls to the appropriate person
- > Increases employee productivity by providing more call control
- > Provides an intuitive user interface that is simple to learn and easy-to-use
- > Offers online Windows®-based PC Pro centralized HTML- based programming access for simple installation, setup and maintenance
- > Offers impressive voicemail and automated attendant capabilities

- > Advanced call processing to eliminate the need for manually directing and routing calls. The automated attendant routes each incoming call based upon the time-of-day and day-of-the-week.
- > Message playback options to allow individuals to set automatic playback upon login, mark previously saved messages as new and change the playback order - First In-First Out (FIFO) or Last In-First Out (LIFO).
- > Different announcements and dialing options for each number in the office.
- > Simplified message management from your email inbox - ability to save, delete or keep as new any voice message that has been forwarded to your email system.
- > Integration with UC Suite enables you to access and visually see your voicemail inbox directly from your desktop client. It allows you to view/play/delete new and archived messages as well as change the status of a message resulting in time saved and increased efficiency.

### Intuitive User Interface

The InMail's interface is simple to learn and easy to use. Pre-recorded voice prompts offer a step-by-step guide on how to use all of the solution's features.

### InMail SPECIFICATIONS

**Ports** - The SL2100 CPU card provides (4) ports of built-in InMail/VRS. It allows (2) hours of InMail storage. Expandable from (4) ports to (16) ports. Each station mailbox must be licensed, however, Call routing, Announcement and Group mailboxes DO NOT require mailbox licenses.

### Voice Storage

Additional InMail Storage - (1G) InMail SD Card - 15 Hours  
(Additional InMail Storage - (4G) InMail SD Card - 120 Hours

**Mailboxes** - 192 Mailboxes (128 subscribers, 32 group and 32 call routing mailboxes)

### Simple Setup, Installation and Maintenance

InMail is digitally integrated with the system's central processing unit to provide increased speed and accuracy to the voicemail system. Additionally, Windows®-based PC Pro enables online centralized HTML-based programming access. When employees use this intuitive browser-based software with its easy-to-follow wizards, time spent programming is reduced and fewer mistakes are made.

### Hospitality Guest Messaging Integration

Hospitality Management integrates with SL2100 InMail Voicemail to give guests the ability to add, delete, change, and confirm their personal greetings and wake-up calls. This package includes:

- > Personalized guest messaging for every room
- > Previous messages, greetings, and security codes are deleted upon new Check-In
